

(a) crossover under six locators

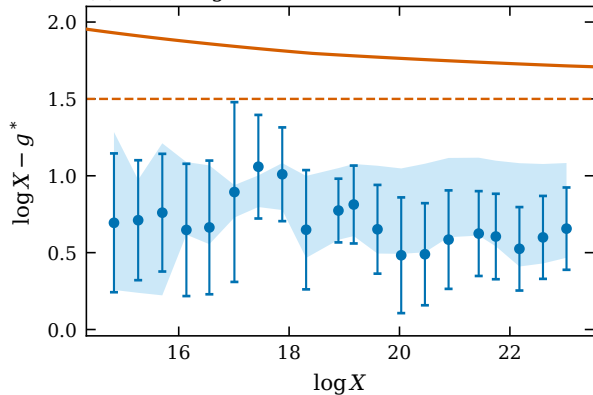

● WLS,  $x \in [0.6, 1.4]$  (primary,  $\pm 1$  SE)

■ window  $x \in [0.5, 1.5]$

▲ band  $|R - 1| < 0.02$

▼ band  $|R - 1| < 0.05$

(b) deficit against the model

.....  $g^* = \log X$

— density model

- - - model asymptote 3/2

■ range over six locators
